Save your lines.

The patented **EZ Claw Line Saver System** keeps air lines, power cords and hydraulic hoses easily supported above the catwalk on tractor-trailer combinations. Learn more at EZClaw.com

Cab Mount

The EZ Claw system offers **several brackets and adapters** to work with specific OEM mounting locations to adequately support the brake hoses and power cords on the back of your cab, and hydraulic lines on your headache rack.

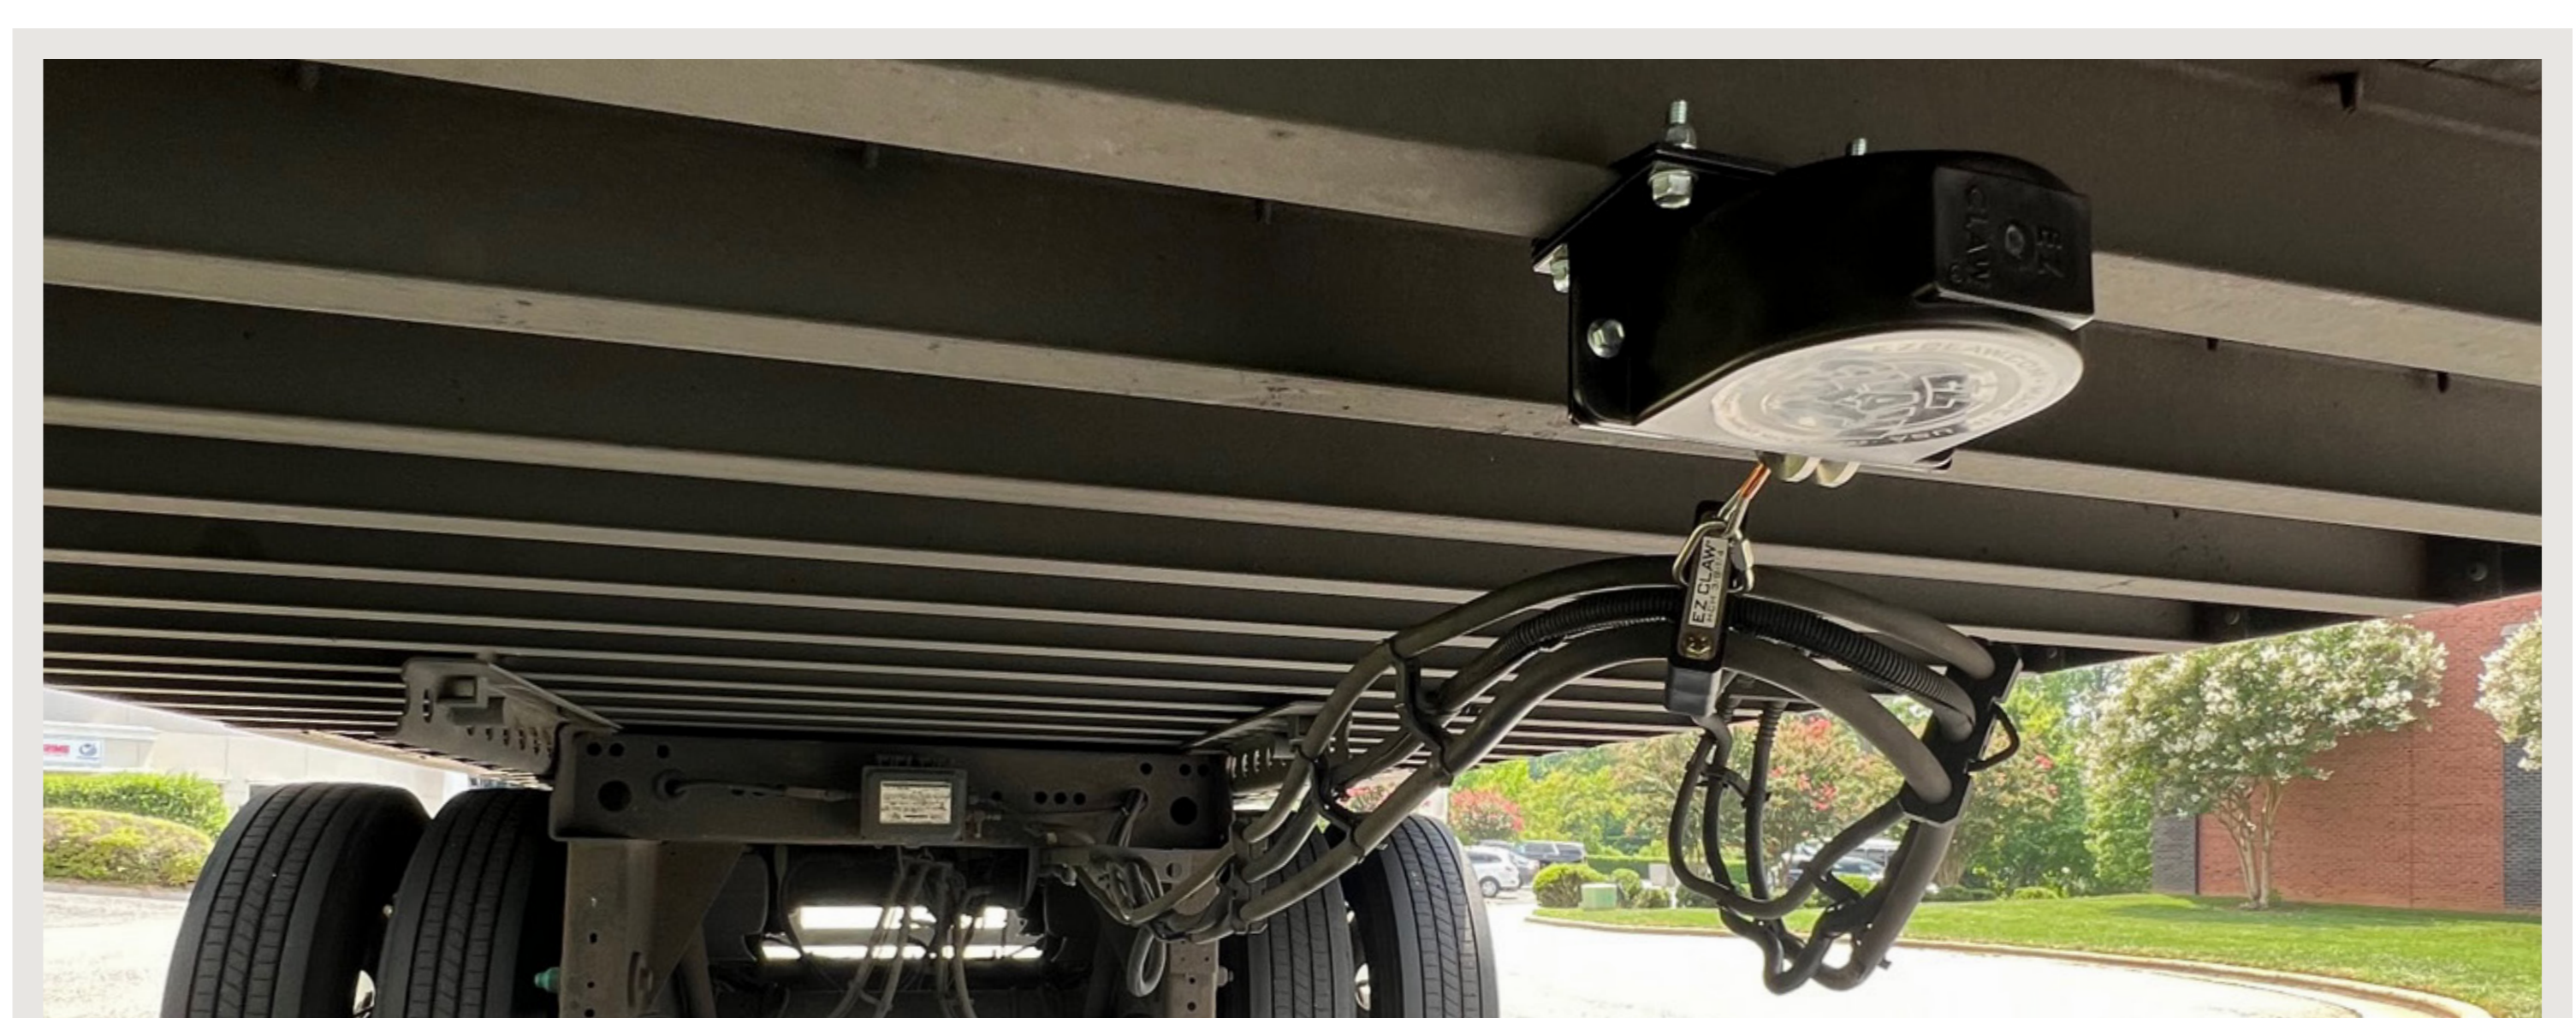

Center Post Mount

Bolt-on, stand-alone mount for trucks with longer wheel bases and hydraulic wet kits. This **6' upright** can support **up to 160 lbs.** of air hoses, hydraulic lines, power cords, lights and more.

Under Trailer Hookup

EZ Claw offers two Line Saver options for Under Trailer applications. The Under Deck California Hookup accommodates **lines plumbed between the frame rails** on semi tractors, while the Tandem Slider provides line support for **sliding tandem axles**.

Why choose EZ Claw?

Perfect Fit

We tailor our tensioners to your tractor. Answer a few questions, and our **EZ Product Finder** will find the exact setup you need for your make and model of semi.

Sturdy Installation

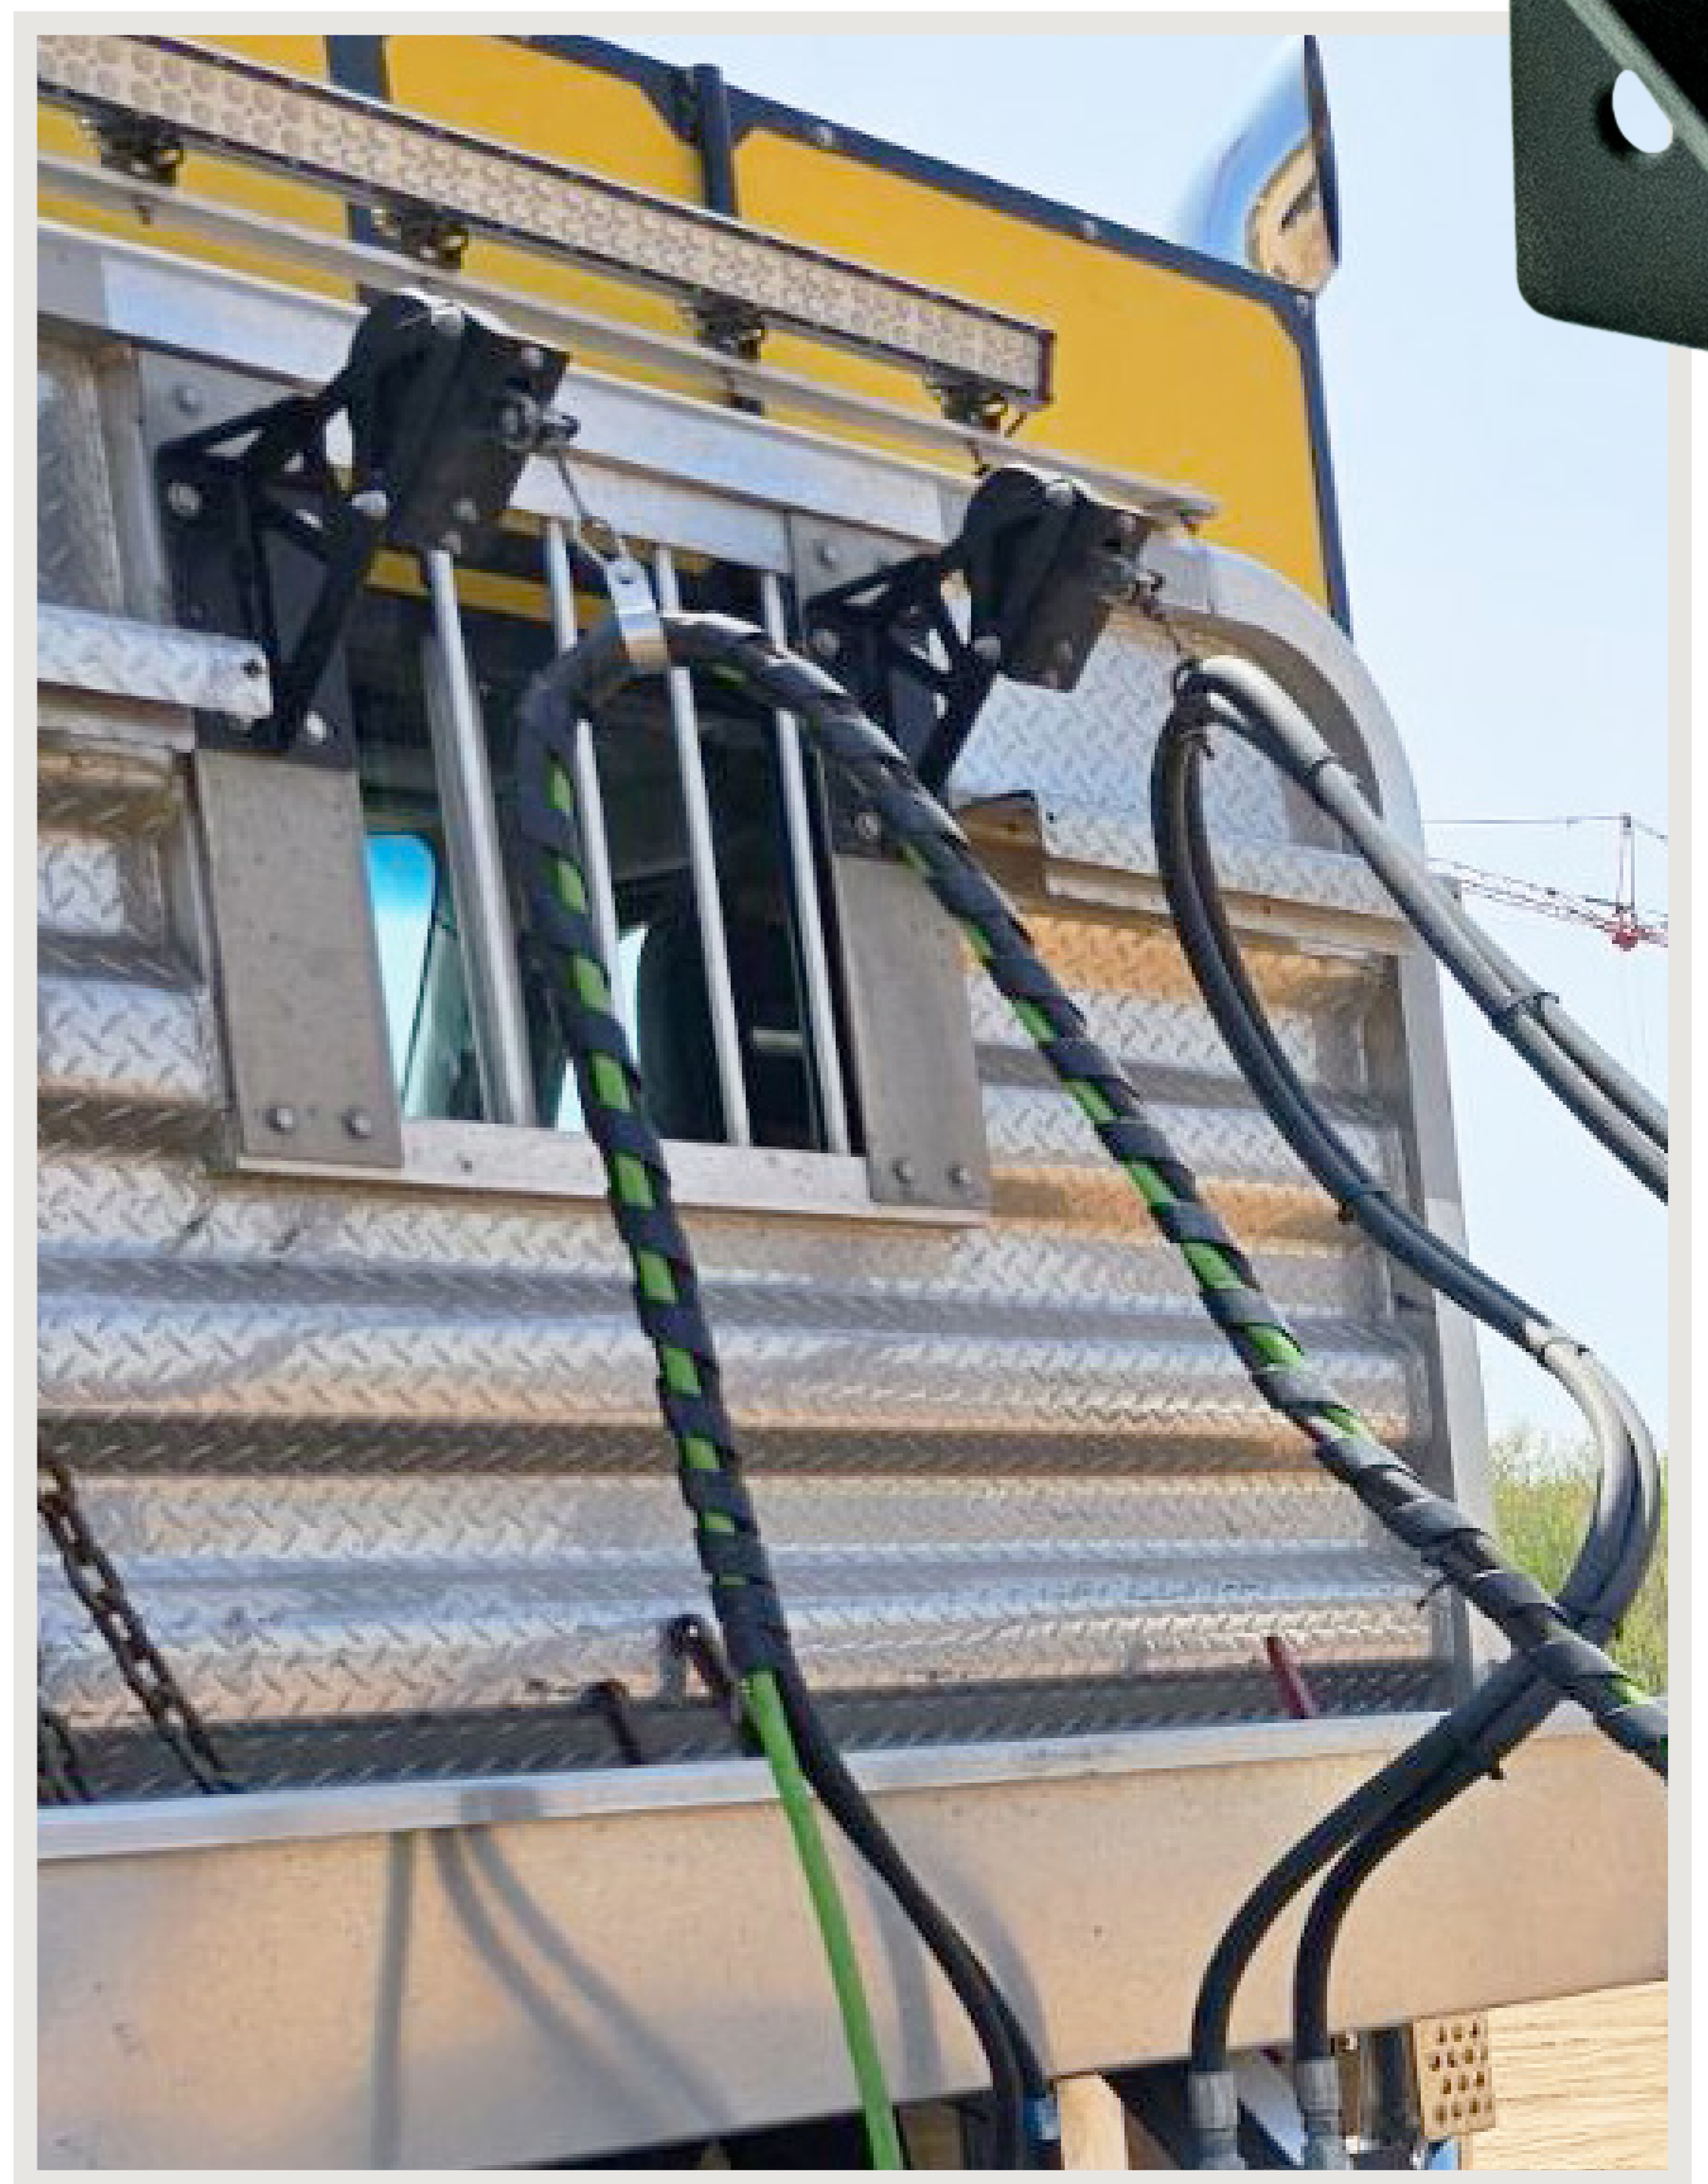

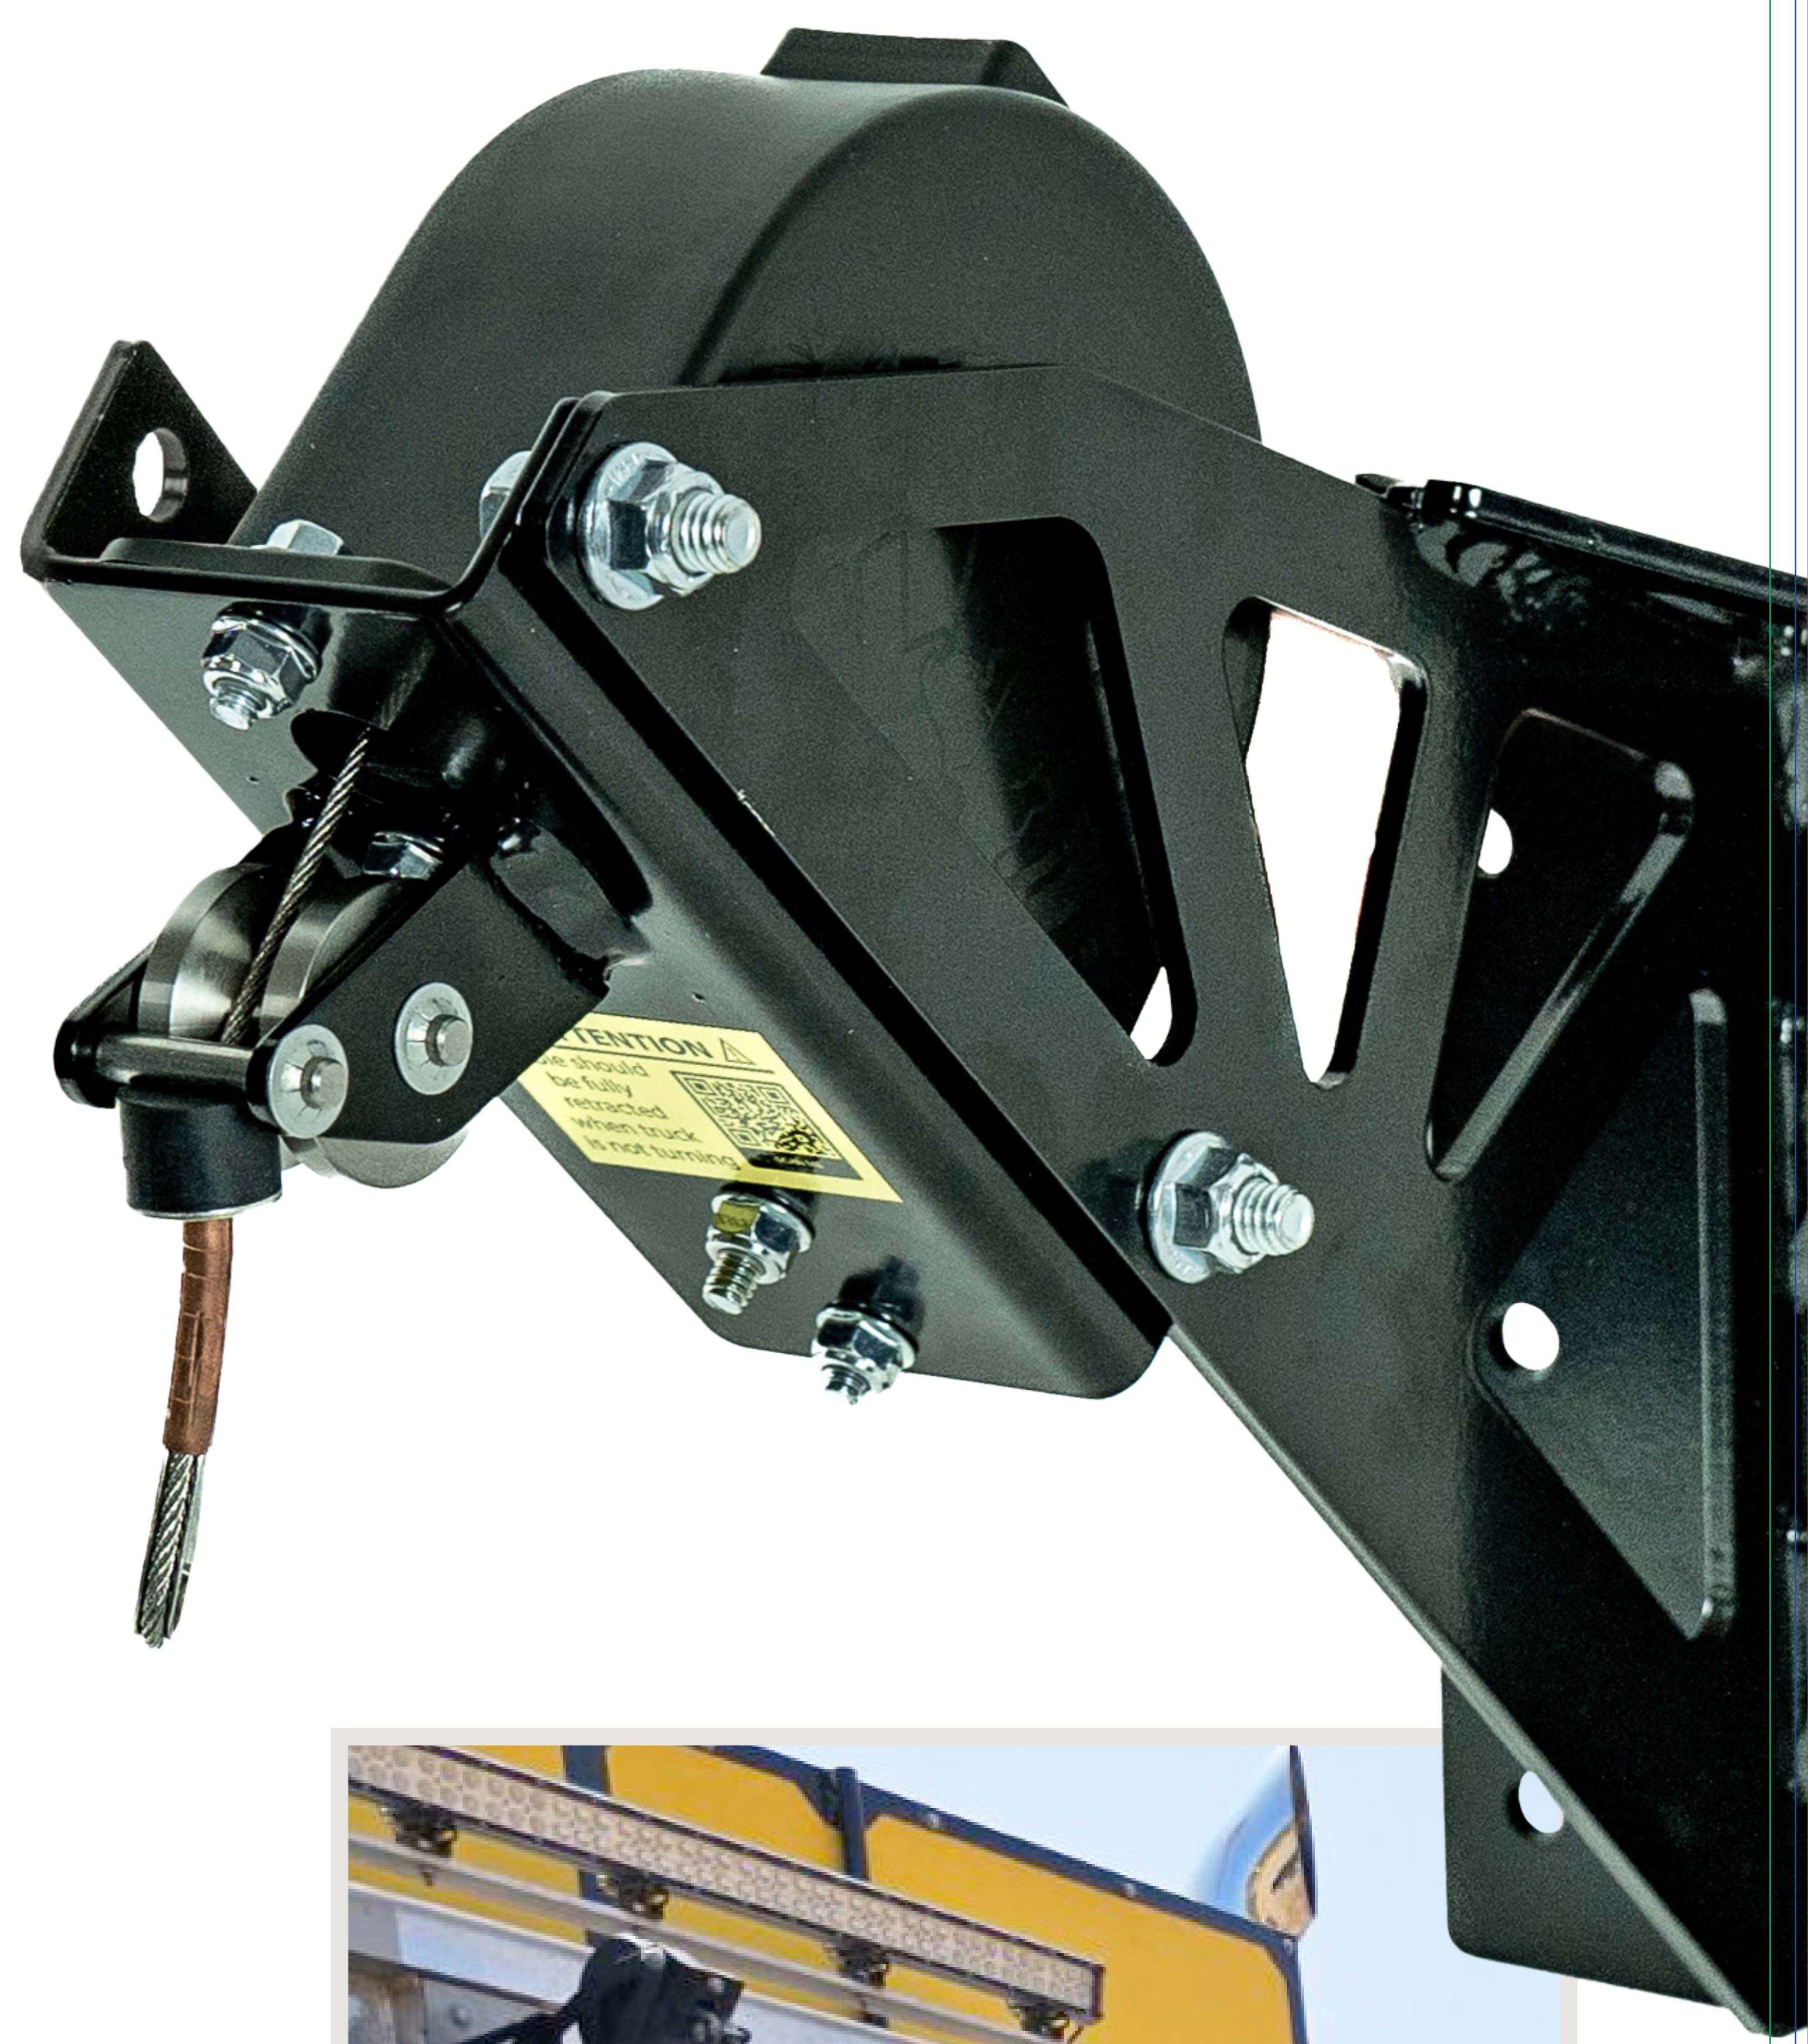

We've designed our brackets to align with **existing OEM mounting locations** for ease of installation. We've also taken into account air fairings, headache racks and other structural considerations when crafting our products. Once installed, our system suspends the hoses **18"-24" higher** than standard springs.

Rugged

All of our products are **made in the USA** with the highest quality materials available. We use the latest engineering technology to fabricate and assemble all of our components to withstand the rigors of the road.

Longevity

We use **stainless steel components** and dual coat our brackets with a **zinc plate and powder coating** to hold up to grime, brine and anything else road spray can throw at them. We encase our tensioners and also salt-test our components to ensure years of uninterrupted use.

Cost Savings

INCREASE Revenue, Efficiency & Productivity

Stay on time and preserve your reputation as a on-time carrier to grow your business.

DECREASE Downtime & Maintenance Costs

Avoid road service calls, detention fees and DOT fines related to unplanned breakdowns. Keep your hoses and lines functioning the way they were meant to be.
